(pairing different devices)
- 4. look ma, no hands**
(using shoX airhead as a hands-free device)
- 5. power up**
(charging your shoX airhead)

1. air time

(turning on your shoX airhead + button control)

ok, we know you're aching to get your tracks flying wirelessly through the air so let's get this gizmo going. To switch it on, press  for 3 seconds while the blinky light thingy flashes blue. When you've blasted enough tracks, hold  until the light flashes red 3 times to power shoX airhead down.

now let's get to know the control buttons:

-  click to play and pause your tracks
-  click to answer an incoming phone call
-  press for 3 seconds to ditch a call
-  click to crank the volume up
-  click to tone it down
-  hold for next track
-  hold for previous track

2. blinky light thingy

(a guide to the colourful blinky lights)

ok, before we start, let's take a look at the blinky lights

-  is flashing blue & red – you're ready to connect to pure Bluetooth bliss
-  is slooowly flashing blue – you should have just heard the sweet tone of successful pairing from your shoX airhead - you are now connected. press and hold the call button () for 2 seconds to disconnect
-  is glowing red – you're in "power up" mode (charging your shoX airhead)
- your shoX airhead)

3. hook a brother up

(pairing different devices)

first things first, switch the shoX airhead on and boom - Bluetooth pairing mode engaged. the blinky light will be flashing blue and red. make sure your device and your shoX airhead are within 1 metre of each other

iphones & ipads

- go to general -> bluetooth & gracefully swipe it to the "on" position
- shoX airhead will become discoverable, touch to connect
- is the blinky light thingy slowly flashing blue? success!

other cellphones & tablets

- turn your Bluetooth on and search for "shoX airhead"
- if a password is required, enter "0000"
- check your Bluetooth device list & connect with your shoX airhead

(flip the page over to continue...)

pure Bluetooth bliss

www.tevo.co.za | info@tevo.co.za

- when the blinky light slowly glows blue, sit back and relax as your tracks glide through the air and tickle those ears of yours.

pc or notebooks*

- activate your Bluetooth connectivity and “search new device”
- once shoX airhead has become discoverable, click on it to connect
- if a password is required, enter “0000”
- is the blinky light glowing blue? it is? sweet success!

*may not work with all pc's and notebooks. connection depends on chip sets & Bluetooth drivers installed

macs

- turn your Bluetooth on and scroll down to “set up Bluetooth device”
- click on “shoX airhead” and continue
- if you're asked for a password, use the always famous password of “0000”

- now open system preferences and click “sound”
- click the output tab and select shoX airhead
- click the input tab and select shoX airhead
- so the blinky light is slowly flashing blue? well done! your Bluetooth pairing was successful

note: once you have successfully paired a device, shoX airhead's intuitive machine brain will remember this device and you won't have to pair the device again, nifty. to pair your shoX airhead with another device, turn off the Bluetooth on your current device and begin the pairing process with the new device

5. look ma, no hands (using shoX airhead as a hands-free device)

if one of your “peeps” drops you a line your music will fade out and your ringtone will play, simply press the  button to accept the call or press and hold the  button for 3 seconds to reject the call (see page 1 “air time”).

6. power up (charging your shoX airhead)

we know you wanna keep the party going all night, but eventually you'll have to charge your shoX airhead. use the usb cable supplied to connect your shoX airhead to a powered-up computer or other device with a usb port. the blinky light will slowly glow red while charging.
